Mark,

I am puzzled by the executive branch creating policy and then keeping that proposed policy from the legislative branch who, as I understand, is the branch solely responsible and authorized to create policy.

It is your duty, sir to disclose that draft policy to this policy member. I would consider it insubordination for you to refuse. I have made my request clear. Your timely compliance it expected.

Further, as a member of this council. I would consider it illegal for my colleagues to even attempt to withhold proposed policies from a council member.

David Madore

Councilor Madore, what you are asking for is contrary to long standing practice at the county. If the full board agrees with your request I will honor it. Mark

Mark,

Rather than waiting to discover what policies are being worked on by staff, please provide whatever you have now.

Thank you,

David

Councilor Madore,

Thanks for your email. While the Charter creates a process for when information is presented to the Council, the public records act gives you as well as the public generally the right to this information at an earlier stage. Reports are being prepared and will become public records when sent to the planning commission(P/C). When planning documents are sent to the P/C, I have asked that a copy be forwarded to you and the other Councilors. Please let me if you have any questions.

Mark

Mark,

I did not realize that staff has been working on a new policy to be incorporated in to the Comp Plan that we are working on. Please email a copy of that draft policy that Oliver and Jeff Swanson said they provided to you.

Are there any other policy changes that staff is working on that we don't know about?

Thank you,

David
